FOREWORD

The format of this handbook includes the most current information available, even if that year's series will not be totally complete. As well, we have gone to a new printing system that we hope will result in a more timely handbook. As always, this handbook for Prince Edward Island has been prepared as a ready reference on agricultural statistics by the Atlantic Office of Statistics Canada and the Marketing Services Division of The Prince Edward Island Department of Agriculture.

The greater part of the material contained herein has been compiled from Statistics Canada sources and surveys. Acknowledgement is made to Agriculture Canada for data obtained from their publications.

We would like to hereby dedicate this publication to the farmers, processors and others associated with the industry who, by their cooperation through surveys and censuses, made the information available. Without their cooperation in returning the data on their operations, this book would not be possible.

Additional information may be obtained by contacting Statistics Canada or the Marketing Services Division of The Prince Edward Island Department of Agriculture.
